Overview

What is ESP?

The Elementary Science Program (ESP) of the Monroe 2-Orleans BOCES provides a hands-on, interdisciplinary curriculum that converts the elementary classroom into a science laboratory. It is a balanced content and process focused curriculum committed to providing students with concrete experiences that promote depth of understanding and science literacy.

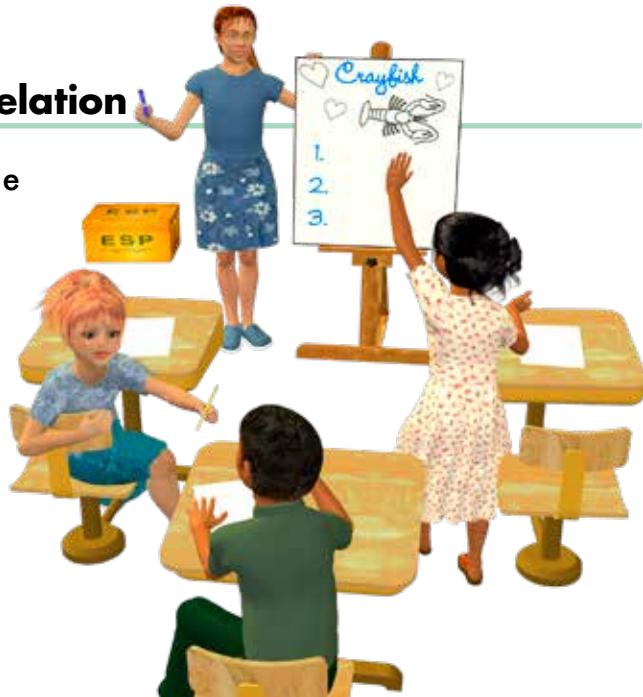

Using the Elementary Science Program units, students learn to think, talk, and act scientifically. The inquiry process and problem solving is emphasized throughout the curriculum. Students are consistently building on their current knowledge, asking questions, conducting investigations, and asking more questions – like true scientists! The meaningful, hands-on activities with student processing of ideas in the ESP science units allow all students to use their hard-wired and learned processes to build meaning.

The ESP curriculum emphasizes the following inquiry, process and STEM skills:

- Classifying
- Communicating
- Comparing and contrasting
- Creating models
- Gathering and organizing data
- Generalizing
- Identifying variables
- Inferring
- Interpreting data
- Making decisions
- Manipulating materials
- Measuring
- Observing
- Predicting

New York State Learning Standards Correlation

The goal of the ESP is to support teachers in meeting the educational goals established by the New York State Department of Education. The educators at the ESP are in the process of realigning curriculum to the new New York State Science Learning Standards. Additional emphasis on STEM activities is being added to existing resource units, and new units are being developed. School districts contracting with the ESP can rest assured that we will remain at the forefront of any changes that occur during this transition period. Correlations are also made, when appropriate, to the Common Core State Standards in English Language Arts and Literacy, and Mathematics.

Overview

Teacher Support

In addition to providing the resources for the classroom, the professional development and on-going support provided by the ESP is a vital part of the program. Support for teachers is also provided through our website (www.espsciencetime.org), online streaming videos, the ESP Facebook page, the ESP listserv, and over the phone. Our staff will also accommodate your school's professional development needs in the area of science instruction.

The Elementary Science Program is committed to help teachers and students engage in science instruction. The curriculum and materials provided through our program allow students to perform activities and pursue ideas and investigations on their own initiative while the teacher provides individual attention and direction.

Units of study are designed by administrators and teachers at the ESP who are certified and experienced in teaching science to students at a variety of grade levels. It is an integrated curriculum that incorporates New York State Science core content with English language arts, math, social studies, and fine arts core content.

Science kits are manufactured and refurbished at the ESP. Districts determine the units they want to use based on their curriculum design.

All units include the hands-on materials for an entire class of students.

- Regular kits are for **thirty (30)** students.
- Mini kits are for **fifteen (15)** students

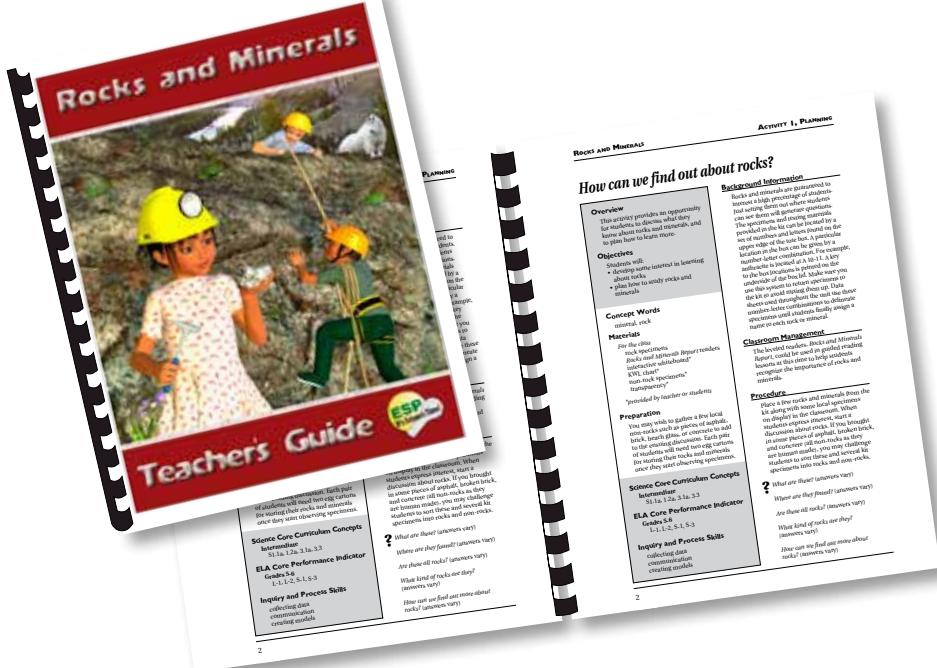

The screenshot shows the homepage of the Elementary Science Program. At the top, there are links for Site Map, Contact Us, and Site Search. Below that is a navigation bar with STUDENT RESOURCES, TEACHER RESOURCES, and ABOUT ESP. A large banner features the text "ESP It's Science Time!" and "ELEMENTARY SCIENCE PROGRAM". It also includes the tagline "It's Science Time!" and images of children exploring outdoors. To the right of the banner, there are sections for News, Featured, and Upcoming Events. The News section has a link to "New Water Quality Testing Equipment Available". The Featured section has a link to "Fall is the perfect time for leaf activities". The Upcoming Events section has a link to "View All Events". On the left side, there is a "Quick Links" sidebar with various links such as Contact Us, Unit Resources & Videos, Files & Documents, FAQ About ESP, Overview of ESP Units, Unit Feedback, Common Core Learning Standards, Next Gen Science Standards, STEM Resources, STEM Connection Kits, Teacher Created Resources, Student Resources, Mary's Blog, Staff Directory, and Monroe 2-Orleans BOCES. At the bottom, there are links for Online Scheduling, Find us on Facebook, and Pinterest. The footer contains the address 36 Turner Drive, Skenectady, NY 14550, phone number (800) 842-4055 or (518) 252-1140, fax number (518) 352-1157, and the text "Elementary Science Program".

Overview

The teacher's guide in each unit provides a wealth of information and guidance for the teacher.

These guides include...

- background information for the teacher on the topic of study
- materials lists
- guidance for preparation of each lesson
- classroom management ideas
- detailed procedures for each lesson
- suggestions for assessment, including when to administer the assessments provided with the unit
- indicators of suggested times to use the leveled readers throughout the unit
- extension ideas for your classroom
- correlations to the New York State Science Learning Standards.

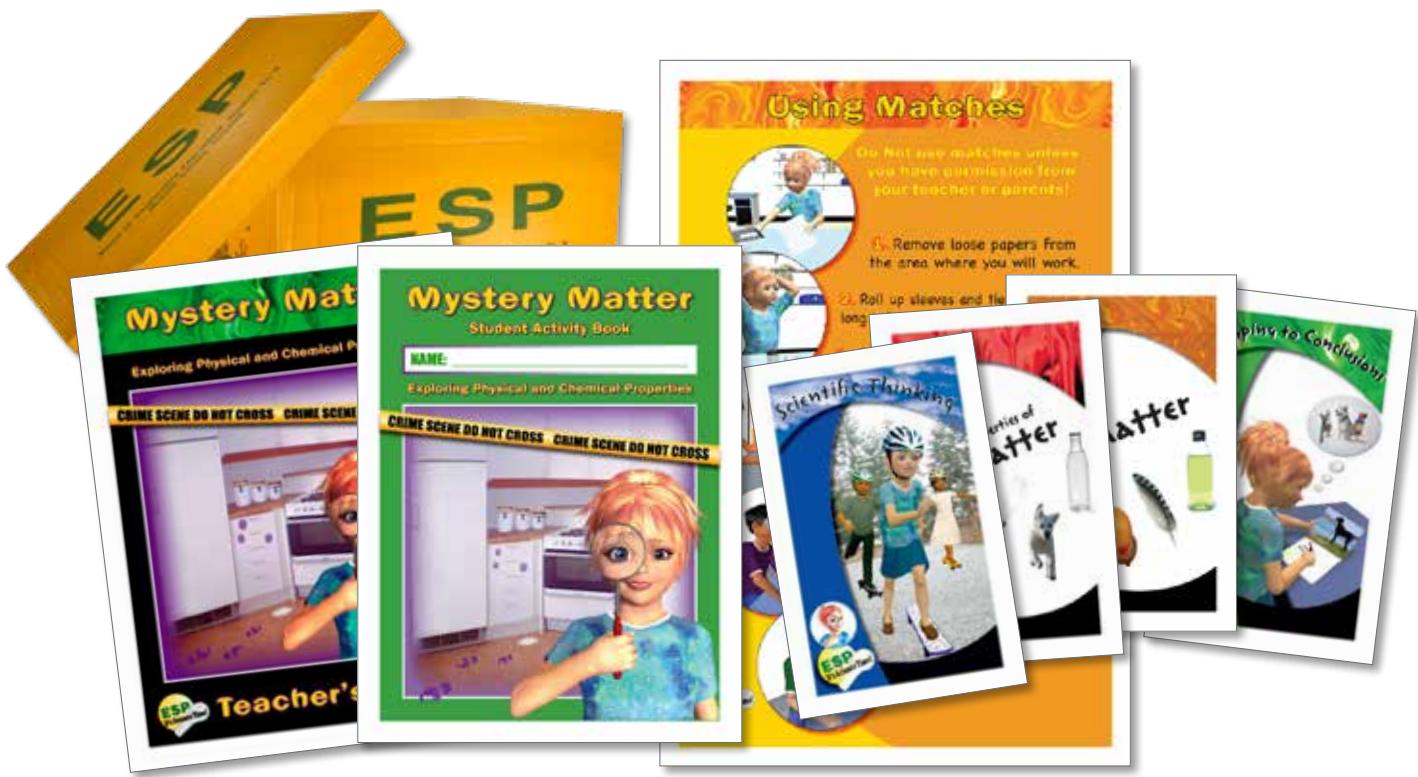

In addition to the teacher's guides, many of the science units provide **student activity books**. The units that currently do not have student activity books encourage the use of science notebooks.

Overview

Literacy Support

The revised ESP units include narrative and expository text, in the form of leveled readers, to support and add depth to instruction. These readers are designed for use in guided reading sessions apart from science time. Using the expertise of Monroe 2–Orleans BOCES reading specialists, each reader has been correlated to Fountas and Pinnell, Lexile and DRA reading levels. Each title is available at grade level and at one grade level above and one grade level below the grade for which the unit was designed. Readers having the same title provide exactly the same science content, despite requiring different levels of reading skill. A sample of the three readers for one of the titles is provided in the kit box. The entire set of readers for a unit can be printed from the password protected portion of the ESP website. Hard copies may also be ordered from the ESP.

Our units have a wealth of resources online at www.espsciencetime.org. These resources include assessments for the unit, leveled readers, interactive whiteboard activities, photos, journal pages, and a variety of other resources that may pertain to a particular unit of study. These resources seek to make teaching and learning science with the ESP units easier and more fun for you and your students.

Overview

Cast of Characters

The revised units have bold, new computer rendered graphics that feature a multicultural cast of six children who model curiosity and excitement about STEM. Students involved in the program will follow these characters through a variety of investigations.

Kindergarteners through third graders will become acquainted with Joe Jemison, Shawna Jackson, and Jake Golden. Fourth through sixth graders will get to know Sasha Brown, Darrell Sand and Maria Lopez. Students will also see the kids' dogs Sparky and Volt from time to time.

- 3 Pieces emery cloth
- 1 Spool braided nylon fishing line
- 1 Roll masking tape
- 15 Pieces oak tag
- 5 Printed protractors
- 5 Tangent charts
- 4 "AA" Alkaline batteries (new style)
or one 6 volt battery (old style)
- 1 Package of wadding
- 1 Package of igniter wires
- 5 Dowels
- 1 Spool thread
- 5 Tri wall bases
- 15 Rocket kits
- 1 MSDS information packet
- 1 Unit Password

Please see KIT PARTS section for ordering only rockets, engines, wadding and igniter wire.

Rocks and Minerals (RPR110) . . . \$93.00

- 1 bag of baking soda
- 5 8d Common nails
- 5 Streak plates
- 5 Clear plastic medicine cups
- 5 "D" cells
- 5 #48 bulbs
- 5 Pieces of copper wire
- 1 *Rocks and Minerals and How We Use Them* Poster
- 1 MSDS information packet
- 1 *Rocks and Minerals* Answer Key (11x17)
- 1 Unit Password

Please see KIT PARTS section for individual Rocks and Minerals specimens.

Senses (RPS105) \$186.50

Mini and regular refill package contents are the same.

Sky Calendar (RPS113) \$129.50

- 12 "D" cells
- 10 8½ x 11 graph paper 1/4"
- 8 Tongue depressors
- 8 Chalk
- 1 Light bulb
- 1 MSDS information packet
- 1 Unit Password

Structures (RPS140) \$137.50

Mini and regular refill package contents are the same.

Waterplay (RPW105) \$84.00

Mini and regular refill package contents are the same.

STEM Resources from ESP

Design Challenge Activities

STEM is easily integrated into your grade 5-8 curriculum with the Elementary Science Program's NEW Design Challenge Activities.

What is included in each Design Challenge?

- ♦ One challenge for the class to complete
- ♦ Overview and procedure for the challenge
- ♦ ALL the materials needed to complete the challenge
- ♦ An assessment of student work

Design Challenge Activities Titles:

#1 - On Top of Spaghetti - Students work in groups to design a support structure for a marshmallow. The challenge is to design a support structure in 18 minutes using only the materials provided.

Cost for activity/materials - \$10.00*

#2 - Boats and Floats - Students work in pairs to design floatation devices out of different materials (foil, wood and clay). The challenge is to design a boat or float, using only the materials provided, that will support the maximum load.

Cost for activity/materials - \$60.00*

#3 - Oil Spill - Students work as a team of engineers contracted to first contain, and then clean up an oil spill off the coast of Puerto Rico with limited materials.

Cost for activity/materials - \$75.00*

#4 - Straw Rockets - Students work in groups to design, test, and modify rockets constructed from straws. A reusable rocket launcher is included.

Cost for activity/materials - \$60.00*

#5 - Solar Cooker - Students work in groups to design and build a solar cooker. Their challenge is to build a cooker that will maintain a temperature of 65° C for 20 minutes. This is the temperature and time needed to pasteurize water making it safe to drink. Included in the supplies is a silver colored vinyl material that provides a highly reflective surface.

Cost for activity/materials - \$75.00*

*Design Challenge Activities are available for purchase only.

www.telegraph.co.uk

Each challenge is aligned to the NGSS:

MS-ETS1-1: Define the criteria and constraints of a design problem with sufficient precision to ensure a successful solution, taking into account relevant scientific principles and potential impacts on people and the natural environment that may limit possible solutions.

MS-ETS1-2: Evaluate competing design solutions using a systematic process to determine how well they meet the criteria and constraints of the problem.

MS-ETS1-3: Analyze data from tests to determine similarities and differences among several design solutions to identify the best characteristics of each that can be combined into a new solution to better meet the criteria for success.

Contact Gina at 585-617-2363 or 1-800-832-8011 or email at gvaccare@monroe2boces.org for more information or to order your design challenges TODAY!

Policies

Return Policy

Due to the cost of shipping and restocking of items returned, all sales of kits, kit parts and publications are final. If you are uncertain about a particular item, please call the ESP at 1-800-832-8011 for additional information. We will be happy to advise you.

Pricing

Due to the volatility of the wholesale prices on certain items, our prices are subject to change without notice. When placing an order for large quantities of materials, please call for current pricing.

Live Materials Policy

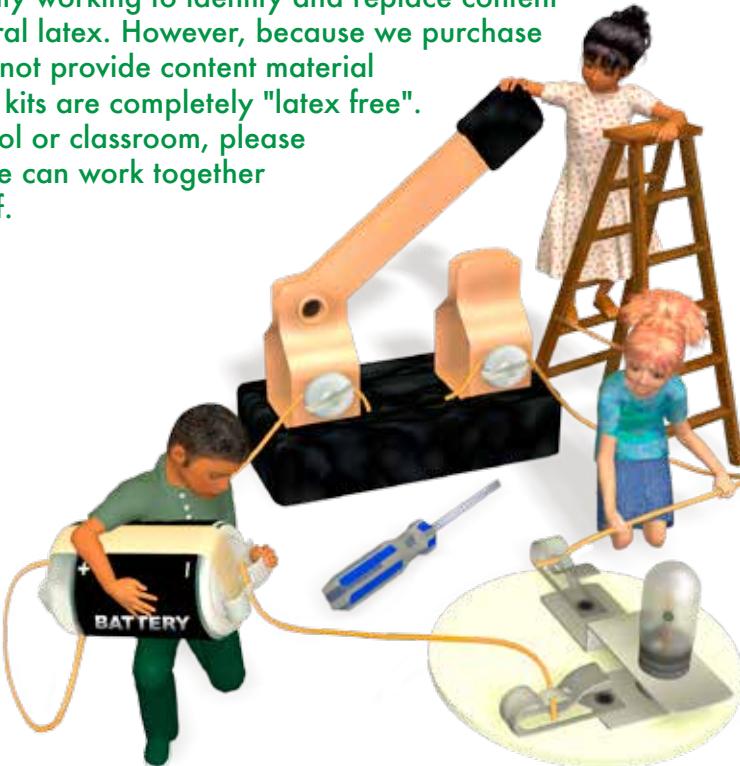

The ESP makes all attempts to package and ship live materials so that they arrive healthy. Because factors such as weather, shipping delays or improper handling are not within our control, we do not make refunds for live materials. Upon request, and when sufficient quantities allow, we will replace and reship live materials at no additional cost.

Inventory Policy

Please inventory your materials upon arrival! Any missing/damaged parts must be reported to the ESP within 2 weeks of UPS delivery date.

Latex Policy

The Elementary Science Program is continually working to identify and replace content items in our kits that potentially contain natural latex. However, because we purchase materials from many vendors, some who do not provide content material information, we are unable to claim that our kits are completely "latex free". If a latex allergy is of concern to your school or classroom, please contact us directly before ordering so that we can work together to insure the safety of your students and staff.
