

International Overdose Awareness Day

August 31 marks International Overdose Awareness Day, the world's largest annual campaign to end overdose.

The Alcohol, Drug Addiction, and Mental Health Services (ADAMHS) Board of Erie County mourns all those who lost their lives to overdose and acknowledges the grief of family and friends left behind.

Substance abuse has had a devastating impact on our community, state, and nation. The Alcohol, Drug Addiction, and Mental Health Services Board of Erie County will continue to work each day to fund critical prevention and treatment programs to help those in need in our community.
