Approval of Minutes

Purpose of the Meeting – Develop additional structure for future meetings specifically, the committee will provide input for items to review for each service area topic in scheduled meetings, add, clarify, or subtract review items. A document developed by the co-chairmen and support staff will be used as a guide and edited, live and on overhead screen during the meeting. After the committee provides input for each topic, request audience comments, then move on to the next topic and repeat the process. Complete as much as possible in one hour. After completion, especially if not all topics were reviewed, determine if committee members prefer to schedule additional work sessions or provide comments directly to co-chairmen for submittal to staff for agendas.

Finally, briefly develop overall structure of scheduled topics for next meetings, such as co-chairmen start meeting, lead members introduce topic, presentations, request, accept and/or review information on review items developed in the Feb 18 meeting. Discuss follow-up action items etc.
