Maximum Credit Hours

- A 3 (or more) college credit hour course equals one unit of high school credit
- School district will ensure that student does not exceed maximum credits allowed
- For students taking high school and college courses, use this formula:
 - Multiply number of high school courses by 3, subtract from 30
– the remainder is the number of college credits available

Maximum Credit Hours

- **Example:** John Smith is enrolled in Algebra 2, English 11 and Chemistry at his high school. He wants to add colleges classes to his schedule.
 - 3 high school courses X 3 = 9
 - $30 - 9 = 21$
 - John can enroll in 21 college credit hours this year
