### How to Be Safe Online

Be careful online! Here are some ways you could be safe on the Internet:

- 1: Don't give out your passwords or personal information because hackers could break into your account, buy things, or do illegal things, which you could get framed for.
  - 2: Don't go on to unprotected sites because when you click on them, hackers could try to get your private information or they could be a virus.
  - 3: Do not add people you do not know on Snapchat or any kind of social media platform. Make sure you know the people or get the username from the person himself or herself.
- Being safe online is essential to protect your privacy. Make sure you follow these steps before you make an account or go online.
