

Responses to RFQ questions from various vendors:

Can you provide any specifics on scope of new construction, remodeling, or renovation that the District is considering and approximate conceptual budget for this work? Will this be funded through ESSER funds? If not, what is the funding source for the project?

The district is looking to renovate roughly 20,000 sq./ft. of unfished space currently within its Central Administration Office, located, 3594 North Snyder Rd., Trotwood, OH 45426. This renovation is to include updating utilities and finishing the space to allow for the growth of student programming. The project will be funded through ESSR allocated dollars with an estimated budget of roughly about \$3,000,000 (3 million).

**What is the scope of the project the school is looking for from the A/E?
Do you have any initial budget in mind? Are you utilizing any ESSER funds?
What kind of schedule, if any, is the school expecting? Design and construction?
What is driving the project? Growth? Aging facilities? Etc.?**

The district is looking to renovate roughly 20,000 sq./ft. of unfished space currently within its Central Administration Office, located, 3594 North Snyder Rd., Trotwood, OH 45426. This renovation is to include updating utilities and finishing the space to allow for the growth of student programming. The project will be funded through ESSR allocated dollars with an estimated budget of roughly about \$3,000,000 (3 million). We would like the project concluded by the end of 2024, with all expenditures closed out. The project is driven by the vision of the district to develop more space for student programming included but not limited to multipurpose space.
