

Donate Blood In Honor Of London Hamilton

London was diagnosed with Ewing Sarcoma in December 2022. Her tumor was wrapped around her right eleventh rib. She went through six rounds of chemo before having resection surgery in May 2023. She began radiation in August 2023. On top of receiving chemo, she's battled multiple infections and specifically neutropenic. London is currently on the last phase of therapy with only two more rounds of chemotherapy left. Throughout her journey she has had 48 transfusions. Blood donors are very important in the cancer world.
