# Health & Safety Plan Update 2022-2023

January 12, 2023 #WestShoreProud

## 2022-2023 Health & Safety Plan Update

# COVID-19 Monitoring

- Families and staff are strongly encouraged to conduct daily monitoring for symptoms and to contact their primary care provider if they suspect they have COVID.
- Per the CDC, individuals who have tested positive for COVID may return to work/school after 5 days if they do not have symptoms or if they are fever-free for 24 hours (without the use of fever-reducing medication) and symptoms are improving.\*
- If a student tests positive for COVID, the school nurse should be notified; however, the District will not contact trace or identify close contacts and will not require healthy students to quarantine due to close contact of a COVID case.

2022-2023 Health & Safety Plan Update

# Keeping Our Schools Open

## Moving Forward

- We will continue to monitor COVID-19 transmission data and related guidance and directives from the DOH, CDC, and PDE.
- As conditions evolve, District administration may recommend updates to our protocols as they become appropriate.
- It is possible the Health and Safety Plan may be revised in the future as circumstances in a building, classroom or District change, or when additional guidance is issued.
