

Customize Your **Seesaw** Notification Settings to meet YOUR needs

1. You can alter the Seesaw Notifications using either the Mobile App OR the Seesaw Website (<https://web.seesaw.me>).
2. Log in as normal.
3. On the **website** > Go to your name in the upper left corner and click
In the **app** > Go to your initial in the upper left corner and tap

4. In both the App and the Website > Go to the Gear > Go to Account Settings. At this point all of the directions should be the same for the mobile app and the website, but the screens may appear slightly different.

5. Scroll to Manage Notifications. Alter your Email, iOS/Android Push Notifications, and SMS Notifications to meet your needs. In this example: the parent is selecting that ONLY emails be sent.

6. Next determine how often you'd like the notifications. We'd recommend at least Once per Day.

7. In this example: the parent will receive email notifications once per day. If you find that you require more or less notifications or prefer a different method, you can alter these settings at any time to meet your needs.
