Wednesday, June 10, 2026, 9:15 a.m.
Question 26, only**

Please photocopy this notice and give a copy of it to each teacher scoring the Regents Examination in Algebra II.

This notice applies only to students who took the June 2026 Algebra II Regents Examination.

The Department has been made aware that certain graphing calculator models truncate the coefficient on the regression equation to fewer digits than required by Question 26. In these instances, students' calculators display an insufficient number of digits, preventing them from rounding in accordance with the directions.

Full (2) credits may be awarded to students who correctly wrote a regression equation, but whose calculator model truncated the coefficient to two decimal places. Note that the base must still be correctly rounded to the thousandth place to receive credit.

Thank you for your hard work on behalf of the students in New York State.
