*-Graduation requirements in Ohio continue to be a topic and two proposals are being considered, with a major debate currently in the Senate. The **ODE Proposal** was in development for over a year, in consultation with practitioners in the field. There are multiple ways for students to demonstrate competency, and provides for flexibility through the culminating student experience. The ODE proposal allows businesses to work with schools to create learning experiences for students and supports workforce development. Competency is demonstrated largely through standardized tests.*
