

LETS GO-OH

SUMMER SYMPOSIUM 2024

LETSGO-OH created the Summer Symposium in 2019 to bring together educators and districts using Apple devices in K-12 school districts. Designed for teachers, administrators, instructional and technology coaches, and technical support staff, the free symposium provides an opportunity for attendees to engage in hands-on learning, collaborate, and network with other Apple users. Participants attending the symposium gain proven strategies for integrating Apple-based technology in instruction.
