

# Meningococcal ACWY Vaccine: What You Need to Know

Many Vaccine Information Statements are available in Spanish and other languages. See [www.immunize.org/vis](http://www.immunize.org/vis)  
 Hojas de información sobre vacunas están disponibles en español y en muchos otros idiomas. Visite [www.immunize.org/vis](http://www.immunize.org/vis)

## 1 Why get vaccinated?

Meningococcal ACWY vaccine can help protect against meningococcal disease caused by serogroups A, C, W, and Y. A different meningococcal vaccine is available that can help protect against serogroup B.

Meningococcal disease can cause meningitis (infection of the lining of the brain and spinal cord) and infections of the blood. Even when it is treated, meningococcal disease kills 10 to 15 infected people out of 100. And of those who survive, about 10 to 20 out of every 100 will suffer disabilities such as hearing loss, brain damage, kidney damage, loss of limbs, nervous system problems, or severe scars from skin grafts.

Anyone can get meningococcal disease but certain people are at increased risk, including:

- Infants younger than one year old
- Adolescents and young adults 16 through 23 years old
- People with certain medical conditions that affect the immune system
- Microbiologists who routinely work with isolates of *N. meningitidis*, the bacteria that cause meningococcal disease
- People at risk because of an outbreak in their community

## 2 Meningococcal ACWY vaccine

Adolescents need 2 doses of a meningococcal ACWY vaccine:

- First dose: 11 or 12 year of age
- Second (booster) dose: 16 years of age

In addition to routine vaccination for adolescents, meningococcal ACWY vaccine is also recommended for certain groups of people:

- People at risk because of a serogroup A, C, W, or Y meningococcal disease outbreak
- People with HIV
- Anyone whose spleen is damaged or has been removed, including people with sickle cell disease
- Anyone with a rare immune system condition called "persistent complement component deficiency"
- Anyone taking a type of drug called a complement inhibitor, such as eculizumab (also called Soliris®) or ravulizumab (also called Ultomiris®)
- Microbiologists who routinely work with isolates of *N. meningitidis*
- Anyone traveling to, or living in, a part of the world where meningococcal disease is common, such as parts of Africa
- College freshmen living in residence halls
- U.S. military recruits

## 3 Talk with your health care provider

Tell your vaccine provider if the person getting the vaccine:

- Has had an allergic reaction after a previous dose of meningococcal ACWY vaccine, or has any severe, life-threatening allergies.

In some cases, your health care provider may decide to postpone meningococcal ACWY vaccination to a future visit.

Not much is known about the risks of this vaccine for a pregnant woman or breastfeeding mother. However, pregnancy or breastfeeding are not reasons to avoid meningococcal ACWY vaccination. A pregnant or breastfeeding woman should be vaccinated if otherwise indicated.

People with minor illnesses, such as a cold, may be vaccinated. People who are moderately or severely ill should usually wait until they recover before getting meningococcal ACWY vaccine.

Your health care provider can give you more information.

## 4 Risks of a vaccine reaction

- Redness or soreness where the shot is given can happen after meningococcal ACWY vaccine.
- A small percentage of people who receive meningococcal ACWY vaccine experience muscle or joint pains.

People sometimes faint after medical procedures, including vaccination. Tell your provider if you feel dizzy or have vision changes or ringing in the ears.

As with any medicine, there is a very remote chance of a vaccine causing a severe allergic reaction, other serious injury, or death.

## 5 What if there is a serious problem?

An allergic reaction could occur after the vaccinated person leaves the clinic. If you see signs of a severe allergic reaction (hives, swelling of the face and throat, difficulty breathing, a fast heartbeat, dizziness, or weakness), call 9-1-1 and get the person to the nearest hospital.

For other signs that concern you, call your health care provider.

Adverse reactions should be reported to the Vaccine Adverse Event Reporting System (VAERS). Your health care provider will usually file this report, or you can do it yourself. Visit the VAERS website at [www.vaers.hhs.gov](http://www.vaers.hhs.gov) or call 1-800-822-7967. VAERS is only for reporting reactions, and VAERS staff do not give medical advice.

## 6 The National Vaccine Injury Compensation Program

The National Vaccine Injury Compensation Program (VICP) is a federal program that was created to compensate people who may have been injured by certain vaccines. Visit the VICP website at [www.hrsa.gov/vaccinecompensation](http://www.hrsa.gov/vaccinecompensation) or call 1-800-338-2382 to learn about the program and about filing a claim. There is a time limit to file a claim for compensation.

## 7 How can I learn more?

- Ask your healthcare provider.
- Call your local or state health department.
- Contact the Centers for Disease Control and Prevention (CDC):
  - Call 1-800-232-4636 (1-800-CDC-INFO) or
  - Visit CDC's [www.cdc.gov/vaccines](http://www.cdc.gov/vaccines)

# Tdap (Tetanus, Diphtheria, Pertussis) Vaccine: What You Need to Know

Many Vaccine Information Statements are available in Spanish and other languages. See [www.immunize.org/vis](http://www.immunize.org/vis)  
 Hojas de información sobre vacunas están disponibles en español y en muchos otros idiomas. Visite [www.immunize.org/vis](http://www.immunize.org/vis)

## 1 Why get vaccinated?

Tdap vaccine can prevent tetanus, diphtheria, and pertussis.

Diphtheria and pertussis spread from person to person. Tetanus enters the body through cuts or wounds.

- **TETANUS (T)** causes painful stiffening of the muscles. Tetanus can lead to serious health problems, including being unable to open the mouth, having trouble swallowing and breathing, or death.
- **DIPHTEHRIA (D)** can lead to difficulty breathing, heart failure, paralysis, or death.
- **PERTUSSIS (aP)**, also known as "whooping cough," can cause uncontrollable, violent coughing which makes it hard to breathe, eat, or drink. Pertussis can be extremely serious in babies and young children, causing pneumonia, convulsions, brain damage, or death. In teens and adults, it can cause weight loss, loss of bladder control, passing out, and rib fractures from severe coughing.

## 2 Tdap vaccine

Tdap is only for children 7 years and older, adolescents, and adults.

Adolescents should receive a single dose of Tdap, preferably at age 11 or 12 years.

Pregnant women should get a dose of Tdap during every pregnancy, to protect the newborn from pertussis. Infants are most at risk for severe, life-threatening complications from pertussis.

Adults who have never received Tdap should get a dose of Tdap.

Also, adults should receive a booster dose every 10 years, or earlier in the case of a severe and dirty wound or burn. Booster doses can be either Tdap or Td (a different vaccine that protects against tetanus and diphtheria but not pertussis).

Tdap may be given at the same time as other vaccines.

## 3 Talk with your health care provider

Tell your vaccine provider if the person getting the vaccine:

- Has had an allergic reaction after a previous dose of any vaccine that protects against tetanus, diphtheria, or pertussis, or has any severe, life-threatening allergies.
- Has had a coma, decreased level of consciousness, or prolonged seizures within 7 days after a previous dose of any pertussis vaccine (DTP, DTaP, or Tdap).
- Has seizures or another nervous system problem.
- Has ever had Guillain-Barré Syndrome (also called GBS).
- Has had severe pain or swelling after a previous dose of any vaccine that protects against tetanus or diphtheria.

In some cases, your health care provider may decide to postpone Tdap vaccination to a future visit.

People with minor illnesses, such as a cold, may be vaccinated. People who are moderately or severely ill should usually wait until they recover before getting Tdap vaccine.

Your health care provider can give you more information.

## 4 Risks of a vaccine reaction

- Pain, redness, or swelling where the shot was given, mild fever, headache, feeling tired, and nausea, vomiting, diarrhea, or stomachache sometimes happen after Tdap vaccine.

People sometimes faint after medical procedures, including vaccination. Tell your provider if you feel dizzy or have vision changes or ringing in the ears.

As with any medicine, there is a very remote chance of a vaccine causing a severe allergic reaction, other serious injury, or death.

## 5 What if there is a serious problem?

An allergic reaction could occur after the vaccinated person leaves the clinic. If you see signs of a severe allergic reaction (hives, swelling of the face and throat, difficulty breathing, a fast heartbeat, dizziness, or weakness), call 9-1-1 and get the person to the nearest hospital.

For other signs that concern you, call your health care provider.

Adverse reactions should be reported to the Vaccine Adverse Event Reporting System (VAERS). Your health care provider will usually file this report, or you can do it yourself. Visit the VAERS website at [www.vaers.hhs.gov](http://www.vaers.hhs.gov) or call 1-800-822-7967. VAERS is only for reporting reactions, and VAERS staff do not give medical advice.

## 6 The National Vaccine Injury Compensation Program

The National Vaccine Injury Compensation Program (VICP) is a federal program that was created to compensate people who may have been injured by certain vaccines. # Vaccine Consent Form

Please select the vaccine(s) you consent for your child to receive:

Tdap

MCV

School Name: \_\_\_\_\_

PLEASE COMPLETE ALL OF THE INFORMATION BELOW - Please print using ink (Incomplete forms will not be accepted)

FIRST NAME of Student:		LAST NAME of Student:	
Gender: Male Female	Birthdate: (mo,day,yr)	Age	Homeroom Teacher / Grade
Address		Mother's Maiden Name (For Registry)	
City		Home Phone # ( ) -	Cell Phone # ( ) -
Zip Code		State	
Student Race: (Circle one) African American / Black White Alaskan/ Native American Asian Hawaiian / Pacific Islander Other			
Ethnicity: Non-Hispanic or Hispanic			

The current health care laws require us to bill your insurance company for the vaccine. The service is offered at no cost to you. Answers are always confidential. Please fill out the following questions pertaining to your child's Health Insurance:

Parent / Guardian Information

VACCINATION & HEALTH-RELATED QUESTIONS

1	Has your child ever had a life threatening reaction(s) after a previous dose of any diphtheria, tetanus or pertussis containing vaccine?		YES	NO
2	Has your child ever had a life-threatening allergic reaction after a previous dose of meningococcal ACWY vaccine?		YES	NO
3	Has your child ever had a condition called Guillain Barré Syndrome (GBS)?		YES	NO
4	Does your child have a blood disorder such as hemophilia?		YES	NO
5	Has your child ever had seizures or another nervous system problem?		YES	NO

IF YOU HAVE ANY HEALTH QUESTIONS, PLEASE CONTACT YOUR CHILD'S PEDIATRICIAN OR CALL US AT 205-609-0268 TO SPEAK TO A REPRESENTATIVE.

I have read the information about the vaccine and special precautions on the Vaccine Information Sheet. I am aware that I can locate the most current Vaccine Information Statement and other information at www.immunize.org or www.cdc.gov. I have had an opportunity to ask questions regarding the vaccine and understand the risks and benefits. I request and voluntarily consent for the vaccine to be given to the person listed above of whom I am the parent or legal guardian and having legal authority to make medical decisions on their behalf. I acknowledge no guarantees have been made concerning the vaccine's success. I hereby release the school system, Health Heroes of Ohio, Inc., HNH Immunizations, Inc., MaxVax LLC., & subsidiaries, affiliated schools of nursing, their directors and employees from any and all liability arising from any accident or act of omission which arises during vaccination. I understand this consent is valid for 6 months and that I will make the school aware of any health changes prior to the vaccination clinic date. I acknowledge that I am giving permission for Health Heroes, Inc. to adjudicate and appeal claims with my insurance providers on my behalf. Clinic dates can be obtained from the school. I understand that the health-related information on this form will be used for insurance billing purposes and your privacy will be protected. I request and voluntarily consent for the vaccine to be given and recorded in the state registry for the person listed above.
