Update on Related Services Personnel Workgroup

In the FY 2018-19 state operating budget, the Superintendent of Public Instruction was directed to establish a workgroup on related services personnel: "The purpose of the workgroup shall be to improve the coordination of state, school and provider efforts to address the related services needs of students with disabilities". This presentation will provide an overview of the purpose and outcomes of this workgroup including identified causes and solutions for the shortage of related services personnel in the school setting. Resources developed for recruitment of related service providers in the school setting will also be shared.
