MACHINING FUNDAMENTALS

\$99 tuition for first 10 applicants

Machining is the hidden backbone to every field and industry. Rochester is known as one of the most highly technical machining-based cities in the nation with over 1,500 manufacturing companies in the area. This program allows you to learn the basics of this in-demand occupation, see if it's the right fit for you, and open doors that will set you on a pathway to a successful career.
