

4th Grade Device Distribution Events 2020-2021

All current 2020-2021 4th graders need to exchange their current iPads for newer units. Every 4th grade student needs this upgraded device to prepare them for the next several years for both in-person and distance learning instruction. In addition, the older devices need to be collected, sanitized, and erased to prepare them for Kindergarten students.

We are asking that you bring your current district iPad for drop off (if you have one) and pick up your new iPad according to the schedule below. If you did not take home an iPad last March, please come to pick up your new device for the 2020-2021 school year.

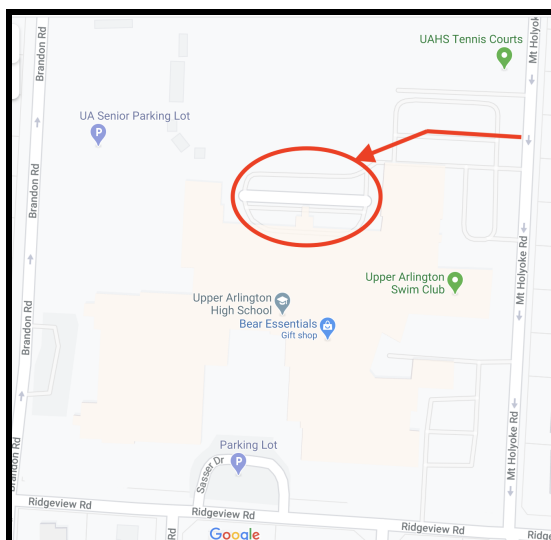

Low / no contact event at the high school

- Drive thru — you won't leave your car
- Students do not need to be present for the event
- Drop off your current device and keep charging cable and charger.
- Pick up your new device.
- Your new device will already be set up and logged in with student information.

*Families who have registered new students **after July 23, 2020** will get their devices when they arrive at school. There is no need for those families to attend one of these pickup days, their accounts, schedule and access will not be ready until closer to the start of school.*
