

MS/HS Renovation Update

The Union City Area School District is entering month number four of our middle and high school renovation. We are all very excited about the changes going on in our buildings and at the same time are ensuring we are providing a safe and healthy atmosphere for our students, faculty, and staff.

In an effort to be as transparent as possible, we are sharing our latest indoor air quality tests with the public. These tests were done by an independent and certified company, Microbac. Please take note that we are well below recommended levels and are even lower than the natural air outside! We will continue to work hard to provide the safest atmosphere possible for everyone involved. We have also attached these results to our web page.

Air test results:

Mold tests, recommended levels are under 2,000 spores

Location	Spore count
Band room, 201	160
Hall by Auditorium	190
Classroom 106	190
Hall by Guidance	290
Classroom 109	210
Classroom 117	290
Classroom 217	190
Hall by Media Center	270
Hall by Classroom 323	270
Classroom 319	190
Compare to outside air	12,000

Air particulate / silica tests

Respirable Particulate (dust in air), 5.0 limit

8 th grade hall	0.05
Inside the closed off construction area	0.28

Silica exposure, 1.0 the limit

less than 0.010
0.571 (Right next to cement work!)
