PHYSICAL EXAM ENTRANCE REQUIREMENTS RELATED TO NFPA 1582

To: All 2021-22 School Year Students, Parents, and Tolles Staff
From: Josh McDowell, Public Safety Coordinator
Subject: Entrance Requirements relating to the NFPA 1582 Medical Exam
Date: August 15, 2019

This document is designed to provide information on entrance requirements as they relate to the required medical/physical exams.

Chapter 4765-11 of the Ohio Administrative Code requires Firefighter I and II training courses to comply with NFPA 1001, Standard for Fire Fighter Professional Qualifications. NFPA 1001, Chapter 4 references NFPA 1582, Standard on Comprehensive Occupational Medical Program for Fire Departments, Chapter 5 which addresses the Essential Job Tasks of candidates (not the Medical Requirements). The Essential Job Tasks discuss the level of exertion, stress, and potential exposures to hazardous substances while performing firefighting tasks, rescue operations, and other emergency response actions; including working in extremely hot or cold environments for prolonged time periods while wearing personal protective ensembles including self-contained breathing apparatus (SCBA).

NFPA 1582 Chapter 5 states that “the physician shall consider the physical, physiological, intellectual, and psychological demands of the occupation when evaluating the candidate’s ability to perform the essential job tasks”; and that “medical requirements shall be correlated with the essential job tasks.”

Based on the language in NFPA 1001 and NFPA 1582, the Division of EMS and the Ohio Attorney General’s office have determined that a local physician, using as a reference the Essential Job Tasks outlined in chapter 5 and the Medical Requirements outlined in chapter 6 of the NFPA 1582 standard, should be properly informed as to the physical demands of the firefighting profession. These tasks and requirements are provided on the back of this document. Therefore, it is within the purview of a physician, working in conjunction with the local chartered fire training program, to determine the physical and medical fitness of a student to participate in a Firefighter training course.

Take this document and the next 2 pages with you so your physicians can review it with your student to ensure they meet the NFPA 1001 entrance requirements. Tolles High School Program students may utilize the Ohio High School Athletic Association (OHSAA) Pre-participation Physical Examination Form, or whatever physical exam form that your doctor's office uses.

**** Please note:** Somewhere on the physical form that you will provide to the Tolles program, the physician must state in writing that ***“the student/patient meets the medical requirements outlined in NFPA 1582 and is able to perform all essential job tasks.”*** This must be on the form for the form to be accepted by Tolles.

ESSENTIAL FUNCTIONS OF FIREFIGHTING

The Essential Functions of Firefighting listed below are meant to serve as a reference resource for physicians when determining the fitness of a candidate for firefighting duties. The Essential Functions of Firefighting are meant to define and to give a broader understanding of the physical requirements demanded of firefighters.

The Essential Functions of Firefighting are merely meant to be used as an aid for physicians when determining the physical status of a candidate. Performing fire-fighting tasks (e.g., hoseline operations, extensive crawling, lifting and carrying heavy objects, ventilating roofs or walls using power or hand tools, forcible entry), rescue operations, and other emergency response actions under stressful conditions while wearing personal protective ensembles and self-contained breathing apparatus (SCBA), including working in extremely hot or cold environments for prolonged time periods.

- Wearing a SCBA, which includes a demand valve–type positive-pressure face piece or HEPA filter masks, which requires the ability to tolerate increased respiratory workloads.
- Exposure to toxic fumes, irritants, particulates, biological (infectious) and non-biological hazards, and/or heated gases, despite the use of personal protective ensembles and SCBA.
- Climbing six or more flights of stairs while wearing fire protective ensemble weighing at least 50 lb (22.6 kg) or more and carrying equipment/tools weighing an additional 20 to 40 lb (9 to 18 kg).
- Wearing a fire protective ensemble that is encapsulating and insulated, which will result in significant fluid loss that frequently progresses to clinical dehydration and can elevate core temperature to levels exceeding 102.2°F (39°C).
- Searching, finding, and rescue-dragging or carrying victims ranging from newborns up to adults weighing over 200 lb (90 kg) to safety despite hazardous conditions and low visibility.
- Advancing water-filled hoselines up to 2 1/2 in. (65 mm) in diameter from fire apparatus to Occupancy [approximately 150 ft (50 m)], which can involve negotiating multiple flights of stairs, ladders, and other obstacles.
- Climbing ladders, operating from heights, walking or crawling in the dark along narrow and uneven surfaces, and operating in proximity to electrical power lines and/or other hazards.
- Unpredictable emergency requirements for prolonged periods of extreme physical exertion without benefit of warm-up, scheduled rest periods, meals, access to medication(s), or hydration.
- Operating fire apparatus or other vehicles in an emergency mode with emergency lights and sirens.
- Critical, time-sensitive, complex problem solving during physical exertion in stressful, hazardous environments, including hot, dark, tightly enclosed spaces, which is further aggravated by fatigue, flashing lights, sirens, and other distractions.
- Ability to communicate (give and comprehend verbal orders) while wearing personal protective ensembles and SCBA under conditions of high background noise, poor visibility, and drenching from hoselines and/or fixed protection systems (sprinklers). Functioning as an integral component of a team, where sudden incapacitation of a member can result in mission failure or in risk of injury or death to civilians or other team members.
